

NEW COMBINATIONS IN HAWAIIAN CUCURBITACEAE
HAWAIIAN PLANT STUDIES 66

Harold St. John

Bishop Museum, Box 6037, Honolulu, Hawaii, 96818, USA.

In order to make them available for use, the following new combinations are proposed:

Cladocarpa hispida (Hbd.) comb. nov.

Sicyos hispidus Hbd., Fl. Haw. Is. 136, 1888.

Sicyocarya (Gray) gen. nov.

sect. Sicyocarya Gray, Am. Acad. Arts Sci., Proc.

3: 54, (1857) = 1853, sensu Gray, excluding

S. pachycarpus H. & A.

Lectotype: Sicyos macrophyllus Gray, Am. Acad.

Arts Sci., Proc. 3: 54, 1853; U. S. Explor.

Exped., Wilkes, Bot. 15(1): 651-652, 1854;

Atlas Bot., pl. 81, 1857.

Sicyocarya cucumerina (Gray) comb. nov.

Sicyos cucumerinus Gray, Am. Acad. Arts Sci.,

Proc. 3: 54, 1853; U. S. Explor. Exped.,

Wilkes, Bot. 15(1): 652-654, 1854; Atlas

Bot., pl. 82, lower left, figs. 4-8, 1857.

Sicyocarya macrophylla (Gray) comb. nov.

Sicyos macrophyllus Gray, Am. Acad. Arts Sci.,

Proc. 3: 54, 1853; U. S. Explor. Exped.,

Wilkes, Bot. 15(1): 651-652, 1854; Atlas

Bot., pl. 81, 1857.

Gray's section Sicyocarya was accepted by Cogniaux (1881: 871, 895) in his monograph of the family Cucurbitaceae, but without discussion he altered the name to Sicyocarpa, and this was also used by F. Pax in the Pflanzenfamilien of Engler (1894: 38). This change was an alteration, not a necessary correction, and the alteration was illegitimate. Gray did not explain the source of his name Sicyocarya, but it was obviously derived from the Greek sikuos, gourd, and karuon, a nut, meaning the nut of the gourd, and this section had as fruit a hard nut.

Gray chose to give the name a feminine gender and ending, so Sicyocarya is feminine.
